

Name: Kwadjo Owusu Ansah Quarshie

Course: **WDD230**

1<sup>st</sup> December 2022

## **Bountiful Foods**

### **SITE PURPOSE:**

Bountiful Foods is a small business focusing on helping rural areas to produce locally made foods. The location is specifically not centered on one place but our goal is to publish updates and any detailed information about these foods project for our citizens to get access to it.

Accessing it won't be difficult because we will work with delivery agents anytime a customer places an order.

We will aim to help the farmers make more money and produce quality products for the consumers.

### **TARGET AUDIENCE:**

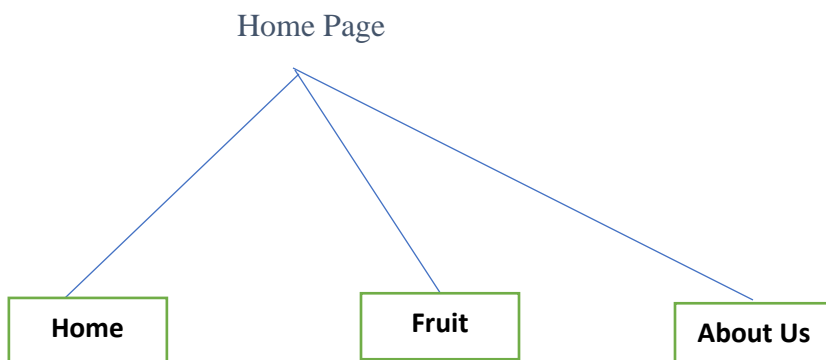

The target audience will mainly focus on students, retailers, and commercials.

Order a healthy and well-prepared drink. Smoothies will also be prepared, in doing all this our team will keep on updating current packages or products and food items on the page for our customers and audience to get used to a lot of updates.

### **PERSONAS:**

Anyone at all can get access to our portal. We're interested in serving the communities and local vicinities. In other words, we've made fruit juice nicely which contains many minerals for the body. All our planned packages are healthy for better growth of the mind, and body and it satisfies the soul as well.

### **SITE MAP**

## COLOR SCHEME

Body

The body of the home page will mainly consist of varieties of images which will be fruits.

The color used;

[#4b74ca](#)

[#e5e5e5](#)

There are a lot of sections made to hold each content as being displayed.

I have a sample of the wire frame explaining the whole site view.

## WIRE-FRAME
